

Refrigerator Deluxe

A MARK SIMONSON STUDIO FONT

USER GUIDE

Congratulations

on purchasing a license to Refrigerator Deluxe. This guide will help you get the most from your new font software. Refrigerator Deluxe uses advanced OpenType technology to provide stylistic options not possible in older font formats.

Alternate Character Forms. To maximize stylistic options, an abundance of alternate characters have been designed. These may be used three ways: Stylistic Sets, the Glyph palette, or by using a “Stylistic Alternates” button or menu item. Availability of these three methods depends on the application you are using. (TABLE A below lists common applications and the methods they provide. Check your application’s documentation for more information about working with alternate characters in OpenType fonts.)

Stylistic Sets. There are 20 Stylistic Sets (1–20) in Refrigerator Deluxe. Sets 1–4 are each composed of selected alternate characters that give Refrigerator Deluxe four distinct looks. The rest can be used individually or in combinations to create your own looks. (See TABLE B on the next page for a complete listing of Stylistic Sets in Refrigerator Deluxe and their effects. See the documentation of your application for instructions on using Stylistic Sets.)

Glyph Palette. Most OpenType-savvy applications include a Glyph palette that provides access to every character in a font. This is a convenient way to change or insert a single alternate character into your text. Characters that have multiple forms are marked with a small right-pointing triangle in the lower right corner of the character cell, enabling you to choose a different form. (See your application’s manual for more info about using the Glyph palette.)

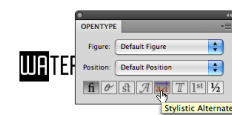

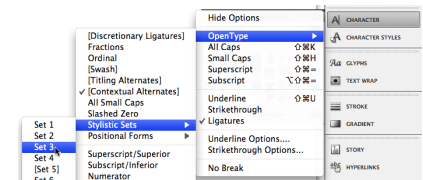

Stylistic Alternates. Some programs also provide a button or menu item labeled “Stylistic Alternates.” This changes the selected character to an alternate form, if any. When there are multiple alternate forms, only the first one can be chosen with this method. See your application’s manual for more info.

Automatic Fractions. Type any two numbers with a forward slash between them (1/2 or 7/16, for example), select them, and then choose “Fractions” from your application’s OpenType menu or palette to create custom fractions.

Superscript and Subscript. They may not come up much in a display face like this, but Refrigerator Deluxe also supports superscript and subscript figure styles.

Case-sensitive Forms. Certain characters, such as the hyphen, dashes, bullet and other punctuation, are aligned to the height of the lowercase by default. However, when you choose the all-caps style (instead of using the shift key or caps lock key), they will align on the caps instead.

¡rumba! ¡RUMBA!

TABLE A	Stylistic Sets	Glyph Palette	Stylistic Alternates
Adobe InDesign 1.0, 2.0, CS		Yes	
Adobe InDesign CS2–CS6, CC	Yes	Yes	
Adobe Illustrator CS, CS2–CS6, CC 2013–2017		Yes	Yes
Adobe Illustrator CC 2018 and later	Yes	Yes	Yes
Adobe Photoshop CS, CS2, CS3, CS4			Yes
QuarkXPress 7.0 and later	Yes	Yes	

Notes: Adobe Photoshop will accept text containing alternate characters, via the clipboard, from Adobe Illustrator. Adobe Fireworks CS4 will accept text containing alternate characters from Adobe Illustrator or Adobe Photoshop. Other applications support alternate characters to varying degrees. Consult your documentation for more information.

Stylistic Set	Off (Default)	On (Set Applied)
01: A Bit More Square	RSaes2	RSaes2
02: Tourist Style	AKMNRSWXYaerswxy&12	AKMNRSWXYaerswxy&12
03: Futura Style	CGJQSajtu&1235679?	CGJQSajtu&1235679?
04: Futura Display Style	ACEFGJKLMNQRSWXY ajkstuwxy&1235679?	ACEFGJKLMNQRSWXY ajkstuwxy&1235679?
05: Square R	R	R
06: Closed S	Ss2	Ss2
07: Closed a and e	aeæ	aeæ
08: Alternate r	r	r
09: Fewer Diagonals	AMNWXywxy	AMNWXywxy
10: Alternate K	Kk	Kk
11: Open Apertures	CGJScs	CGJScs
12: Alternate J	J	J
13: One-story a	aæ	aæ
14: Simple j	j	i
15: Simple t and u	tu	tu
16: Rounded Corners	EFL	EFL
17: Open G	G	G
18: Alternate Q	Q	Q
19: Alternate Ampersand	&	€
20: Force Two-Story a	a	a

Notes: Sets 1–4 provide selected “recipes” of alternate characters designed to give Refrigerator Deluxe a specific look. The remaining sets can be combined (when software allows) to create your own custom recipes or used alone to change only a few characters (or even just one). Set 20 is provided to override the one-story “a” in sets 3 and 4. Accented characters and Cyrillic are not shown in this table, but are fully represented in the Stylistic Sets.
